California 911 System

| CA 911 Outages | | |
|---------------------|--------------------|---------------------|
| Northern California | Central California | Southern California |
| No 911 Outages | No 911 Outages | 911 Outages |

911 Outages/Remote/Community Isolations:

On 12/05/17, the Frontier Santa Paula remote central office in Ventura County reported that 329 landlines had no dial tone due to power failure as a result of the Thomas Fire. Currently, these customers are unable to dial out to 911. However, wireless service is not impacted at this time. The Public Safety Answering Point (PSAP), Ventura County Sheriffs Office (VCSO), are taking calls normally and have been notified of the isolation.

- Per the CA 911 Branch on 12/14/17 at 1844 hours:
 - Per Frontier, the Topa Hut remote office has been temporarily restored through a microwave shot from the South Mountain.
 - Dial tone is restored for customers with access lines and wiring that is in tact.
 - Individual customers with damaged distribution lines are still out of landline service.
 - Destroyed lines and poles in the area will need to be repaired before service can be re-established fully.
 - Repair work is in progress, as some access to the affected area is now being granted.

Service Interruptions:

Per the CA 911 Branch on 12/14/17 at 1844 hours:

Due to massive infrastructure damage caused by the Thomas Fire, the ongoing wireline community isolation in Santa Paula will not be resolved in the immediate future.

- A temporary microwave solution is being stood up in the area, however even with the microwave solution, those individuals customers with damaged distribution lines will still be out of landline service.
- No ETTR has been provided at this time, Frontier will provide a status update on 12/15/17.

WEATHER OF CONCERN

Weather of Concern

- The National Weather Service has issued Red Flag Warnings for most of North and Central California valley locations beginning tonight through Sunday, 12/17/17. Gusty winds and very low relative humidity are expected to produce critical fire conditions.
- High pressure over Santa Barbara will produce sundowner winds tonight through Saturday, 12/16/17. Sundowner winds are strong winds that generally blow in a northerly direction.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

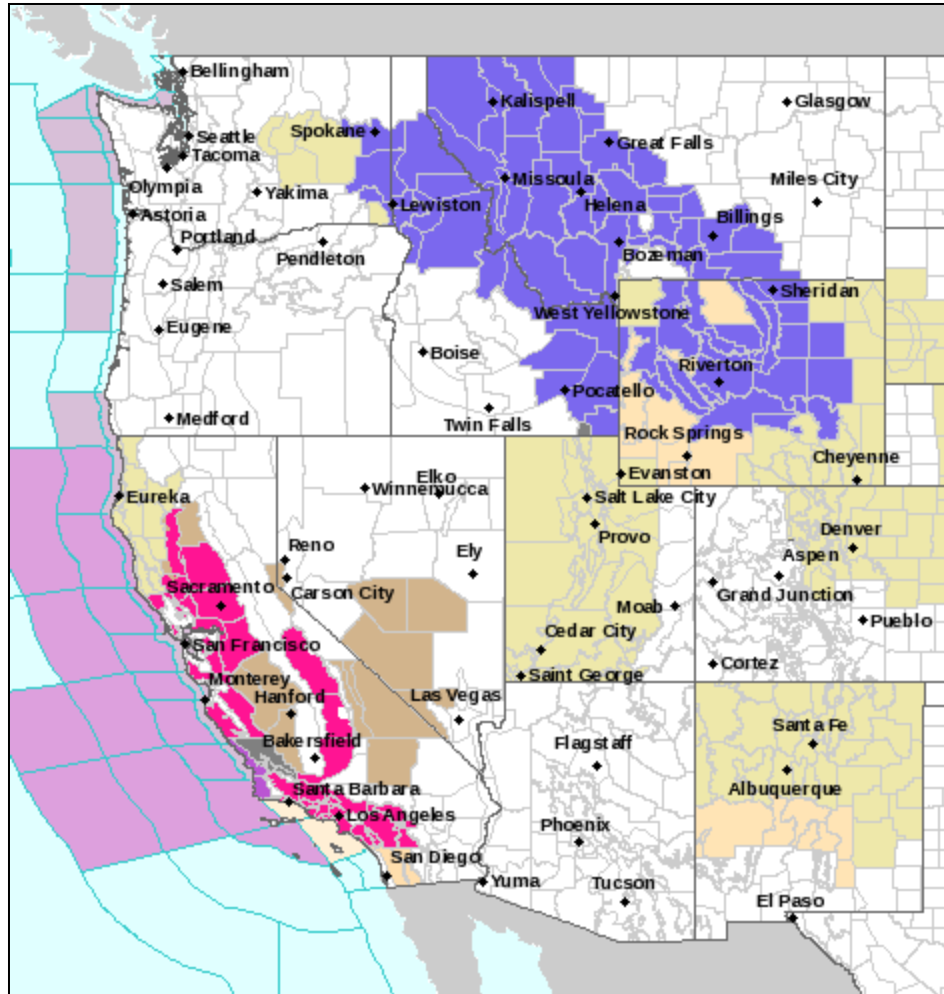

Gusty N to NE winds from a dry cold front, which impacted portions of the upper Sacramento Valley and west slopes of the Cascades and Sierra ranges overnight, will gradually lower today. A stronger, cold frontal passage is still expected Friday night into Saturday. Some light precipitation, mainly in the form of snow, will be possible across the far north. The bigger story will be the strong to very strong N to NE winds. Expect general gusts between 30 to 40 mph with localized gusts as high as 60 mph favoring the Friday night through Saturday night period. The Diablo-Santa Cruz, Bay Marine and Sacramento Valley and surrounding foothill Predictive Service Areas will be impacted the most by the strong wind. At the same time, humidity values will lower behind the frontal passage and allow for teen minimum's by Saturday afternoon. The wind gradient will begin to relax some on Sunday with much lighter speeds Monday. Residual low to very low humidity values expected both Sunday and Monday before gradually climbing on Tuesday. Based on the combination of fuel and weather conditions, have decided to go with a High Risk for the Sacramento Valley and surrounding foothills, Bay Marine and Diablo-Santa Cruz PSA's during the weekend period. Humidity and temperatures are a bit marginal but the wind speeds should overcompensate that. There are also areas within the Sacramento Valley that have had better greenup although the surrounding foothills are more susceptible to fire spread. Another potent cold frontal passage is expected to impact the North Ops region Wednesday through Friday. Temperatures should be even cooler with this system and break the long string of above normal afternoon readings the region has been observing. Some precipitation will also be possible with this frontal passage but amounts look to be on the lighter side at this time.

SOUTHERN CALIFORNIA

A trough dropping southward into northern Mexico and the Southwest will generate gusty winds today through the weekend. Early this morning, widespread northeast winds of 20-30 mph with gusts over 50 mph were occurring over the region. These winds will weaken later this morning with only San Diego County and the Banning Pass area seeing east winds of 15-30 mph this afternoon. Late tonight into Saturday, strong northerly flow will develop which will bring north-northwest winds of 20-30 mph with infrequent gusts to the central coast and the west side of the San Joaquin Valley. Locally gusty north winds of similar velocities will be possible Saturday morning in Santa Barbara County and the I-5 Corridor. Winds across all of Central California will weaken Saturday night, and as the flow switches to the northeast, the region will again see gusty offshore winds by Sunday morning. Expect moderate Santa Ana conditions throughout the day Sunday with widespread winds of 20-30 mph with gusts to 60 mph with the strongest winds likely occurring over Ventura and Los Angeles County. Temperatures over the next few days will cool off significantly with highs in the 40s in the mountains to the lower 70s in the valleys by Sunday. Minimum relative humidity (RH) will remain in the single digits over most areas through the weekend, but some recovery may occur in Central California on Sunday. Some clouds and instability may allow for a few sprinkles in the Sierras and points off the coast both Saturday and Sunday. Winds should become light by Monday with the weather turning warmer for the first half of next week. Another cutoff low may bring strong offshore winds around next Thursday. There is no significant precipitation in the long range models.
